Career Objective

Career-oriented B.Tech (Data Science) student with strong foundations in Python, SQL, and Machine Learning. Demonstrated problem-solving ability through solving 150+ LeetCode DSA challenges. Seeking internship opportunities to apply analytical skills and contribute to real-world software and data-driven projects.

Education

B.Tech (Data Science) – Buddha Institute of Technology, Gorakhpur (2022-2026) with 8.4 CGPA

Intermediate – CBSE with 90.8% in 2022

High School – CBSE with 84.80 in 2020

Skills Summary

- **Languages** - Python, SQL, C language
- **Data Tools** - Power BI, MS Excel, Pandas, NumPy, Matplotlib, Seaborn
- **Platforms** - Windows
- **Web Technologies** - HTML, CSS, React.js, Flask, FastAPI
- **Cloud**: Vercel, Render
- **Soft Skills** - Leadership, Communication, Time Management, Event Management

Experience

- **Python Stack Intern • Infosys springboard** | [Certificate](#) Nov 2025 – Jan 2026
 - Gaining hands-on experience in Python development, data handling, and backend logic implementation.
 - Writing clean, efficient, and modular code for scalable application development.
 - Collaborating with the team to design and optimize backend solutions for real-world projects.
- **Data Analytics Intern • IBM PBL CSRBOX** | [Certificate](#) July – August 2025
 - Worked on real datasets to perform data cleaning, visualization, and analysis using Python and Excel.
 - Completed a project on business insights using IBM Data Analytics tools and dashboards.

Projects

- **Flight-Booking-Simulator with Dynamic Pricing** [Project Link](#)
 - Build a **web-based flight booking simulator** that lets users search flights, see fares, and complete a multi-step reservation process.
 - Implement a **dynamic pricing system** where ticket prices vary based on booking time, seat availability, and simulated demand.
 - Develop a **robust full-stack backend** to handle APIs, database management, seat inventory, and concurrent transactions.
- **GeoPulse (Final Year Project)** [Project Link](#)
 - Built an intelligent soil quality detection system using Deep Learning techniques.
 - Analyzed soil health data to classify fertility levels and generate actionable insights.
 - Aimed to assist farmers and researchers in sustainable farming and crop yield optimization.
- **Quiz Generator Using Open AI** [Project Link](#)
 - Developed a web-based application that generates MCQs from user-provided content such as notes or PDFs.
 - Integrated OpenAI API to automatically create accurate and diverse quiz questions.
 - Aimed to assist students and educators in learning and assessment through AI-powered quiz generation.

Certification

- Presented a Research Paper at ICSDS-2025
- **1stRank** – TECHYUVA (College-level Competition)
- **SOFTPRO INDIA** – Python Programming Certification
- **IBM PBL CSRBOX** – Data Analytics Internship Certificate
- **Artificial Intelligence Internship Certificate** – INTERNSHALA, Virtual
- **Introduction to Machine Learning** – NPTEL, Virtual (Jan 2025 – Apr 2025)
- GFG(160)

Leadership & Extracurriculars

- **Class Representative, B.Tech Data Science Department** — Demonstrated leadership and coordination skills.
